

# STERLING IRONS

## Sterling Set - Single Length Irons

**In stock and available now**

**A unique set design to be built to one length for all clubs to deliver a perfect match of all elements of swing feel for shot consistency.**

- Available in a #5 hybrid or #5 iron to match the player's desire and ability, with #6-9, PW and Gap Wedge and Sand Wedge
- Maximum custom fit capability with any Wishon Golf S2S iron shaft model and flex to meet the swing speed, transition/tempo and release point of the golfer

### Why Single Length?

- Single Length construction ensures all possible elements of swing feel are identical for each club in the set - same MOI, same total weight, same head weight, same balance point - to offer the chance for improved shot consistency
- Identical length and lie allow the golfer to use the same stance, same posture, same swing plane

## The Difference

### Sterling

- Optional high COR #5 hybrid with high COR #5, 6 and 7 irons offer proper distance for the low loft clubs at the shorter single length
- Conventional cast carbon steel in the #8 to gap wedge with 5° loft increments blend with the high COR design of the low loft clubheads to offer proper distance gaps and proper distance with the high loft clubs
- Sterling Irons Single Length clubs can be built to 36.5", 36.75" or 37" length for each club as fit by the Clubmaker for the golfer's comfort and preference

### Other sets

May lose distance with the low loft clubs

May generate too much distance with the high loft clubs

Most other single length sets are created for a 37.5" length - which can generate too much distance with the high loft irons
